

THE CHALLENGE should be in getting down  
the mountain, not getting into your boots.

[www.headusa.com](http://www.headusa.com)

Lately, a lot of technology has gone into boots. But very little has gone into putting them on. Until now. Meet the EZ-On. With an ingenious cuff that actually expands to receive your foot, and stays vertical thanks to Autowalk. So you can literally put these babies on, hands-free. Honest. No really. And once on, they provide so much comfort and performance you'll be in no hurry to take them off. (Though, of course, that's ridiculously easy too.)
